

The scatter plot displays a series of blue circular data points. The x-axis, labeled 'Time', has major tick marks at 5.0, 5.1, 5.2, 5.3, and 5.4. The y-axis, which is unlabeled, has a range from 0 to 1. The data points form a smooth, downward-sloping curve that starts at a high y-value (around 0.95) at Time 5.0 and decreases to a low y-value (around 0.15) at Time 5.45. The points are more densely packed at the beginning of the time series and become more spread out as time increases.
